

TECHNOLOGY COMPLIANCE REPORT

Chinese Technology Assessment

Index-AniSora Repository Analysis

Report Date: February 05, 2026
Repository: <https://github.com/bilibili/Index-anisora>
Classification: Technology Compliance Review

EXECUTIVE SUMMARY

COMPLIANCE STATUS: NOT RECOMMENDED FOR USE

This report analyzes the Index-AniSora repository for Chinese technology dependencies. The assessment concludes that this repository is **ENTIRELY** built on Chinese technology and should **NOT** be used by organizations with restrictions on Chinese AI technology.

1. PRIMARY DEVELOPER

Repository Owner: Bilibili

Entity	Location	Details
Bilibili	Shanghai, China	Major Chinese video platform company

The entire repository is developed and maintained by Bilibili, one of China's largest video sharing platforms. All development team members are affiliated with Bilibili and based in China.

2. FOUNDATION MODELS (ALL CHINESE-DEVELOPED)

Index-AniSora is built upon the following foundation models, all of which originate from Chinese organizations:

Model	Developer	Origin
CogVideoX-5B	THUDM + Zhipu AI	Tsinghua University, Beijing
Wan2.1-14B	Alibaba / Tongyi Lab	Hangzhou, China
Wan2.2	Alibaba / Tongyi Lab	Hangzhou, China

2.1 CogVideoX-5B Details

CogVideoX is a text-to-video diffusion model developed by THUDM (Tsinghua University Data Mining group) in collaboration with Zhipu AI, a Chinese AI company. The model was developed entirely in China and serves as the foundation for AniSoraV1.0.

2.2 Wan2.1/2.2 Details

Wan2.1 and Wan2.2 are video generation models developed by Alibaba Group's Tongyi Lab. Released in February 2025, these models serve as the enhanced foundation for AniSoraV2.0 and V3.2. Alibaba is a Chinese multinational technology company headquartered in Hangzhou.

3. HARDWARE DEPENDENCIES

Training Infrastructure

Technology	Details
Huawei Ascend 910B NPU	Project was "entirely trained on domestic chips"

The repository explicitly states native support for Huawei Ascend 910B NPUs and emphasizes that training was performed entirely on domestic (Chinese) chips. Huawei is a Chinese multinational technology company that has been subject to U.S. trade restrictions.

4. INSTITUTIONAL AFFILIATIONS

The following Chinese institutions are directly involved in the technology stack:

Institution	Type	Role
Tsinghua University	University	CogVideoX foundation model
Zhipu AI	Company	CogVideoX co-developer
Alibaba Cloud	Company	Wan2.1/2.2 developer
Bilibili	Company	Index-AniSora developer
Huawei	Company	Training hardware provider

5. COMPLIANCE CHECKLIST

Assessment of key compliance factors:

Component	Status	Origin
Repository Owner (Bilibili)	CHINESE	Shanghai, China
Foundation Model: CogVideoX-5B	CHINESE	Beijing, China
Foundation Model: Wan2.1/2.2	CHINESE	Hangzhou, China
Training Hardware: Huawei NPU	CHINESE	Shenzhen, China
Development Team	CHINESE	China-based

6. CONCLUSION AND RECOMMENDATION

RECOMMENDATION: DO NOT USE THIS REPOSITORY

Based on this comprehensive analysis, Index-AniSora is fundamentally a Chinese AI project with no non-Chinese alternatives within its architecture. Every major component - from the repository ownership to the foundation models to the training infrastructure - originates from Chinese companies and institutions.

For organizations subject to restrictions on Chinese AI technology, this repository should be considered **non-compliant** and its use should be **avoided entirely**.
